Summary

Software Engineer with 4 years of experience building applications using Java, Spring Boot, React, and cloud technologies. Skilled in system design, microservices, and delivering scalable, secure, and efficient solutions across domains.

Skills

Programming Languages	Java, Python, Javascript
Libraries & Frameworks	SpringBoot, SpringSecurity, Hibernate, Reactjs
Tools	Git, Github, Mysql, Redis, Docker, Kafka, Cursor, ChatGPT
Other skills	DSA, Design patterns, System design, Microservice, Frontend development

Work Experience

Software Engineer II, Klearnow.AI July 2025 - present

- Worked on microservices-based platform KlearNow Engine focused on import/export filing and customs clearance.
- Designed and implemented REST APIs, gRPC calls, and event-driven communication between services for seamless data exchange.
- Engineered PGA (Partner Government Agency) data transformation, converting complex EDI-based data into user-friendly structured formats for faster processing.

Software Engineer, Sevya Dec 2021 - June 2025

- Developed a full-stack application using Java, Spring Boot, ReactJS, and MySQL to manage employee details, improving data accessibility and operational efficiency.(client-Analog Device)
- Designed and integrated JWT authentication in Spring Boot applications, enabling secure user login, authority management, and access control for critical endpoints.
- Designed and implemented a graphical user interface using Python and PyQt5, reducing manual work and increasing productivity by streamlining the process of viewing generation details.(client-Stmicroelectronics)

Projects

ECommerce Application — Java,Spring Boot, Spring Cloud

- Architected a Microservices based ECommerce Platform with support of core functionalities of any ECommerce Website like Product Catalog, Order Service, Notification Service etc.
- Implemented Event Driven Email Service to allow sending emails at large scale across different services within the Platform.
- Optimized the response time of APIs by making effective usage of Caching for static data using Redis Cache.

Education

Siliguri Institute of Technology 2016 - 2020
B.Tech in **Information Technology**
